

Leading a Progress Unified by Data

Datamam transforms data into strategic advantage, empowering enterprises to move faster, automate smarter, and lead with confidence.

The velocity and complexity of internal and external data are overwhelming & rising fast.

Billions of new signals - product listings, prices, events, reviews, news - appear daily

80% of modern analytics depend on unstructured or semi-structured external sources

Enterprises are under pressure to make faster, more confident decisions-but lack the right data pipelines

Legacy scraping tools and basic vendors can't meet scale, compliance, or business integration needs

Data is no longer a nice-to-have-it's a strategic necessity.

Speed-to-insight is directly linked to competitive positioning.

External data drives use cases in pricing, product launches, sentiment, and M&A.

Compliance frameworks like ISO, GDPR, and CCPA demand trustworthy data pipelines.

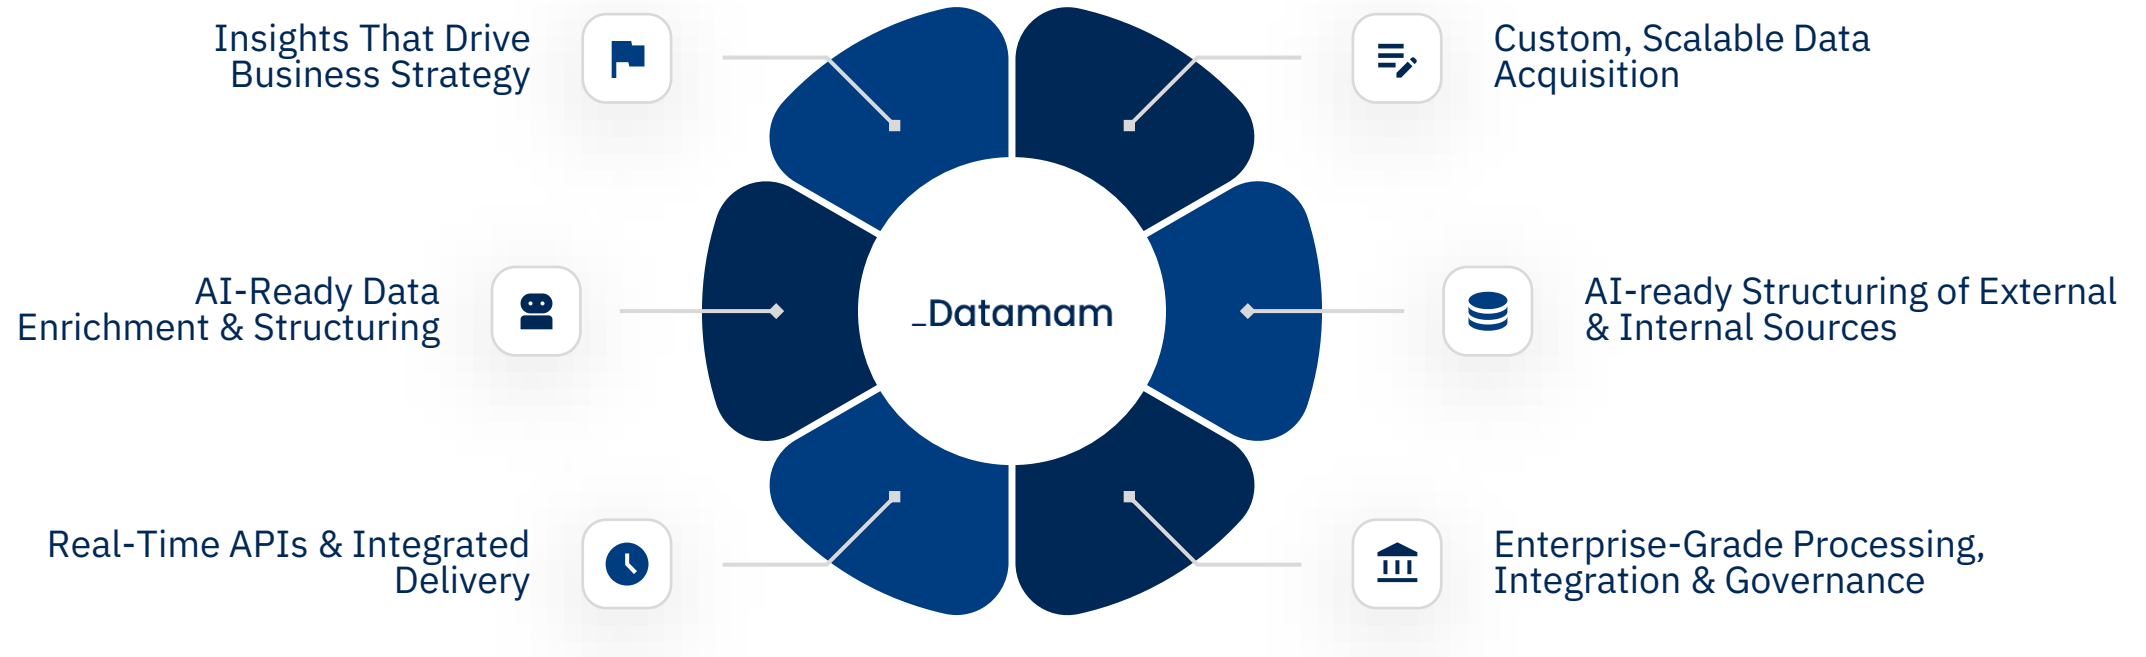

Generative AI requires vast, curated, and labeled datasets.

Internal analytics and reporting depend on clean, unified data.

From “what’s out there” to “what do we do next”

We specialize in Consultative Data Strategy & Architecture

Powered by 1,000+ scrapers, 10B+ data points monthly, and 15+ years of experience.

From data acquisition to business transformation.

Accelerated product development cycles

01

Improved AI model performance with curated datasets

05

Optimized pricing and margin control

02

Increased trust in internal reports and dashboards

06

Market-specific audience segmentation

03

Faster, smarter decision-making with unified data

07

Reduced manual research by 60–90%

04

We don't just deliver data. We are Unifying external and internal data into strategic intelligence.

We collaborate with enterprise leaders who treat data as infrastructure:

CEOs / Strategy Leaders

Use real-time competitive and market intelligence to drive M&A, product strategy, and geographic expansion.

CMOs

Analyze consumer sentiment, track competitor positioning, and optimize campaigns with external behavioral data.

CTOs / CIOs

Implement scalable, compliant data pipelines that connect external sources with enterprise platforms and analytics tools.

Heads of Data / BI

Unify fragmented datasets, enrich external signals, and deliver structured, analysis-ready data to internal stakeholders.

Legal / Public Sector

Monitor court dockets, procurement notices, and regulatory shifts across jurisdictions to ensure compliance and reduce risk.

We bridge the gap between data availability & business action.

Legacy Data Vendors

Generic tools

Raw data dumps

Limited scalability

Compliance risk

Service disruption risk

Datamam

→ Custom frameworks per client

→ AI-ready structured insights

→ Unlimited scalability, high-frequency

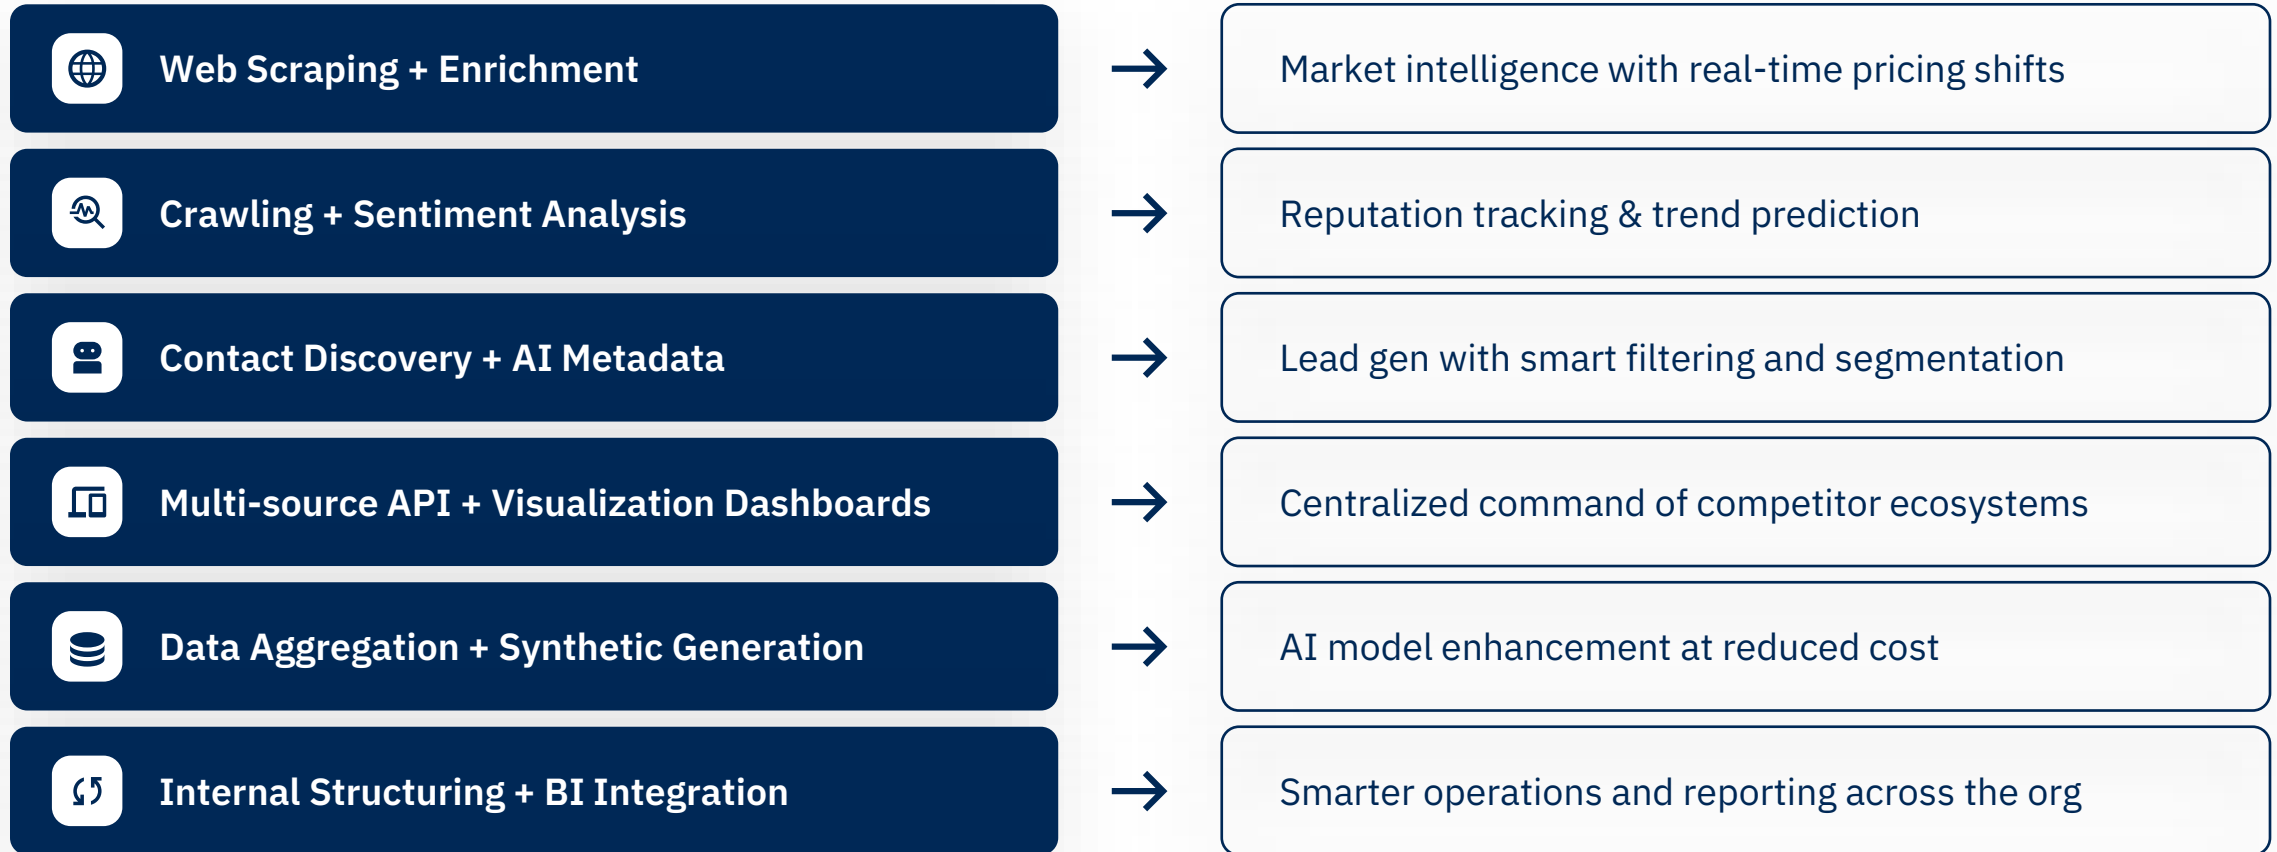

→ ISO 27001-certified & Legal compliance

→ Risk mitigation framework (RMF)

From acquisition to insight—end-to-end capabilities

The power of combining services—built to multiply value.

Trusted across industries were data fuels strategy.

Mini Case Snapshots:

- 1 Global Retailer** – Combined real-time scraping with predictive analysis > launched a new line 2 weeks ahead of competitors
- 2 Tech Firm** – Deployed multi-source crawling + sentiment extraction > 10% boost in product satisfaction
- 3 Finance Company** – Implemented live data feeds via API > improved risk modeling 3x faster
- 4 Legal Provider** – Automated court docket extraction > cut research time by 60%

We build data infrastructure tailored to each client's goals-across any sector, any scale.

E-Commerce

Competitive price scraping, MAP policy monitoring, SKU-level assortment tracking, digital shelf analytics.

Finance

Alternative data feeds for risk modeling, sentiment-based trading signals, executive movement tracking, earnings call trend analysis.

Technology

AI/ML training datasets, user review mining for product feedback, issue clustering from support forums, roadmap validation through community data.

Legal & Government

Multi-jurisdictional court docket aggregation, procurement tender monitoring, compliance watchlist automation, regulatory change detection.

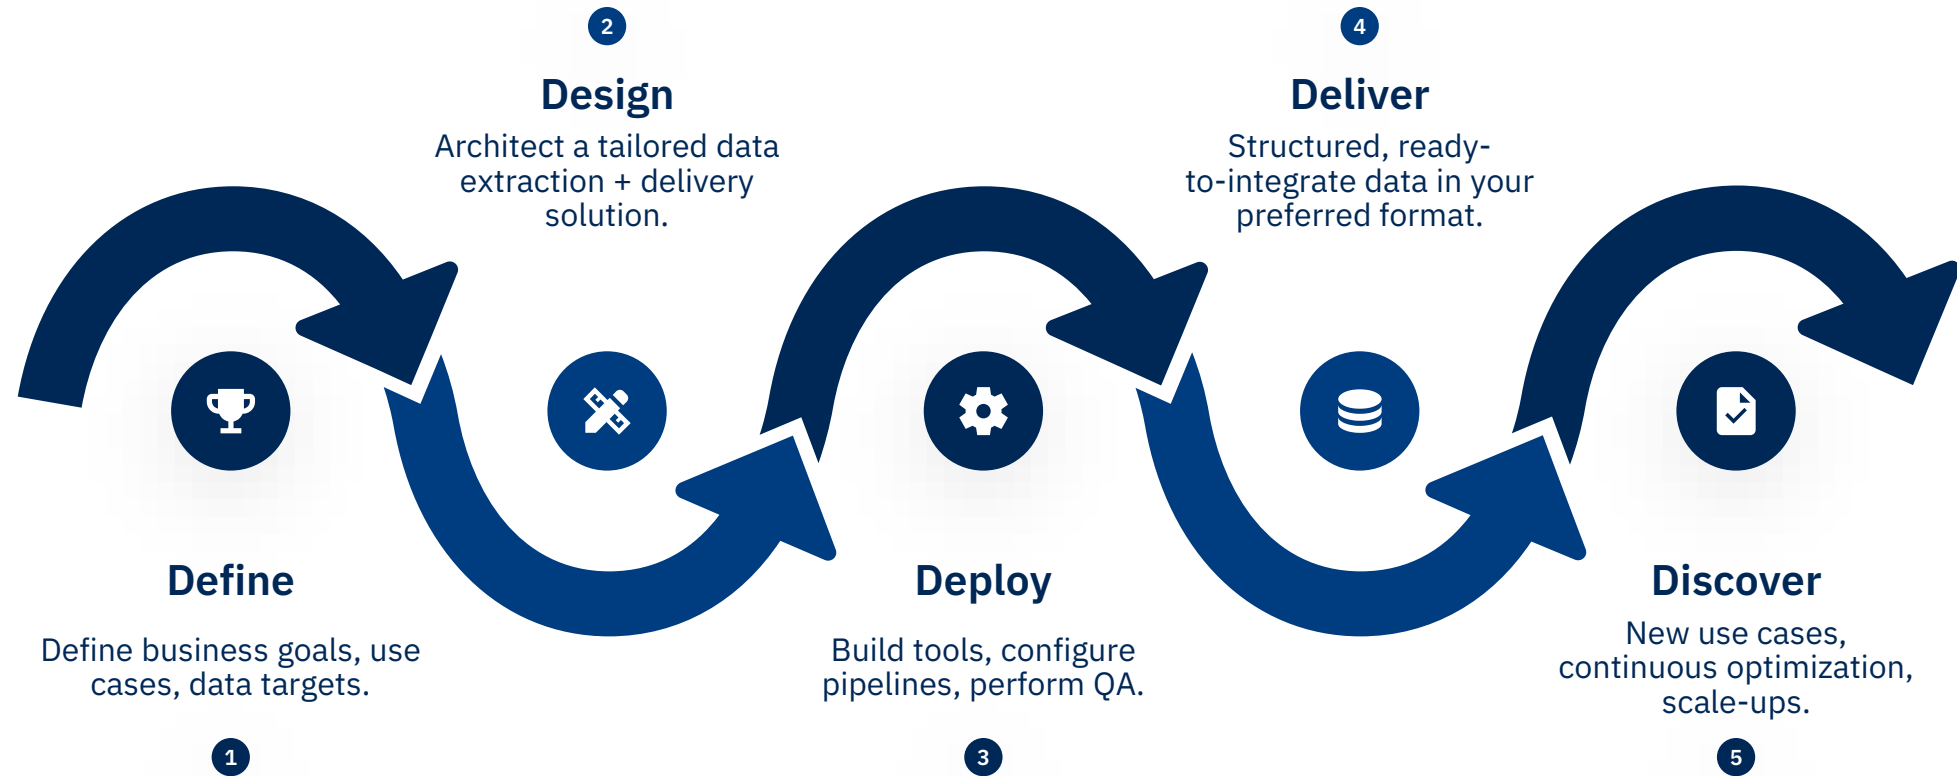

Automotive

Dealer inventory feed standardization, MSRP vs. market price gap analysis, VIN-level data collection, regional demand and pricing intelligence.

A consultative, end-to-end delivery model built for outcomes.

YOU DON'T NEED MORE DATA

You need the right data-activated, enriched, and delivered your way.

We unlock data's ability to transform.

Unlock the power of data to drive innovation, optimize operations, and make smarter decisions with Datamam's comprehensive, integrated solutions.
